Govt. I.A.S.E, Masab tank, Hyderabad.

In this institute teaching learning process is very interactive. All the faculty asks questions about the subject and beyond the subject also i.e faculty members asks different types of questions to know the previous knowledge and they expect the response from the all students. In the class room if the student gives the response then all the students are active and here all activities are live. Lectures asks the questions because interactive session will bring in the class room.

→ Student-Teachers are involved in their activities like classes and practical papers. They participate and complete their work and improve the student-Teacher knowledge through this.

→ In this institute every staff member/lecturer while going to the class well prepared.

→ Main purpose of the faculty members is to develop the new skills and knowledge for student teachers of Govt. IASE.
